

Contents

| | |
|----------------------------------------------------------------|-----------|
| Chapter 1 Introduction | 1 |
| 1.0 Cam-Follower Systems..... | 1 |
| 1.1 Fundamentals..... | 1 |
| 1.2 Terminology..... | 4 |
| Type of Follower Motion..... | 4 |
| Type of Joint Closure | 4 |
| Type of Follower..... | 5 |
| Type of Cam..... | 6 |
| Type of Motion Constraints | 8 |
| Type of Motion Program..... | 8 |
| 1.3 Applications | 9 |
| 1.4 Timing Diagrams | 11 |
| 1.5 Cam Design Software..... | 12 |
| 1.6 Units..... | 12 |
| 1.7 References..... | 14 |
| Chapter 2 Unacceptable Cam Curves | 16 |
| 2.0 Introduction..... | 16 |
| 2.1 S V A J Diagrams | 16 |
| 2.2 Double-Dwell Cam Design—Choosing S V A J Functions..... | 18 |
| 2.3 The Fundamental Law of Cam Design | 21 |
| 2.4 Simple Harmonic Motion (SHM) | 21 |
| 2.5 Constant Acceleration (Parabolic Displacement)..... | 24 |
| 2.6 Cubic Displacement | 24 |
| 2.7 Summary | 25 |
| 2.8 References..... | 25 |
| Chapter 3 Double-Dwell Cam Curves | 26 |
| 3.0 Introduction..... | 26 |
| 3.1 Cycloidal Displacement for Double dwells..... | 26 |
| 3.2 Combined Functions for Double dwells..... | 29 |
| Fall Functions..... | 40 |
| 3.3 The SCCA Family of Double-Dwell Functions | 40 |
| 3.4 Polynomial Functions..... | 44 |
| The 3-4-5 Polynomial..... | 45 |
| The 4-5-6-7 Polynomial | 48 |
| 3.5 Fourier Series Functions | 51 |
| 3.6 Summary | 55 |
| 3.7 References..... | 55 |
| Chapter 4 Single-Dwell Cam Curves | 56 |
| 4.0 Introduction..... | 56 |
| 4.1 Single-Dwell Cam Design—Choosing S V A J Functions | 56 |
| 4.2 Single-Dwell Applications of Polynomials | 60 |
| Effect of Asymmetry on the Rise-Fall Polynomial Solution | 61 |
| 4.3 Summary | 67 |

NOTE: There is no Chapter 5 in this book. That chapter from the parent book has been omitted from this abridged version for brevity. Consult the *Cam Design and Manufacturing Handbook* for that chapter on *Spline Functions*.

Chapter 6 Critical Path Motion Cam Curves 68

| | | |
|-----|--------------------------------------------------------|----|
| 6.0 | Introduction..... | 68 |
| 6.1 | Constant Velocity Motion | 68 |
| | <i>Polynomials Used for Critical Path Motion</i> | 69 |

Chapter 7 Cam Size Determination 81

| | | |
|------|--------------------------------------------------------------------------------|-----|
| 7.0 | Introduction..... | 81 |
| 7.1 | Pressure Angle—Radial cam with Translating Roller Follower | 82 |
| | <i>Eccentricity</i> | 83 |
| | <i>Choosing a Prime Circle Radius</i> | 86 |
| 7.2 | Pressure Angle—Barrel Cam With Translating Roller Follower..... | 87 |
| 7.3 | Pressure Angle—Barrel Cam With Oscillating Roller Follower..... | 89 |
| 7.4 | Overturning Moment—Radial Cam With Translating Flat-Faced Follower | 91 |
| 7.5 | Pressure Angle—Radial Cam With Oscillating Roller Follower | 92 |
| 7.6 | Pressure Angle—Globoidal Cam With Oscillating Roller Follower | 95 |
| 7.7 | Radius of Curvature—Radial Cam With Translating Roller Follower | 96 |
| 7.8 | Radius of Curvature—Radial Cam With Translating Flat-Faced Follower | 100 |
| 7.9 | Radius of Curvature—Barrel Cam With Translating Roller Follower..... | 104 |
| 7.10 | Radius of Curvature—Barrel Cam With Oscillating Roller Follower..... | 104 |
| 7.11 | Radius of Curvature—Radial Cam With Oscillating Roller Follower | 105 |
| 7.12 | Radius of Curvature—Radial Cam With Oscillating Flat-Faced Follower | 105 |
| | <i>Undercutting of Radial Cams with Oscillating Flat-Faced Followers</i> | 106 |
| 7.13 | Radius of Curvature—Globoidal Cam With Oscillating Roller Follower | 107 |
| 7.14 | References..... | 108 |

Chapter 8 Cam Design Guidelines 109

| | | |
|-----|----------------------------------------------------------------------------|-----|
| 8.0 | Introduction..... | 109 |
| 8.1 | Practical Design Considerations..... | 109 |
| | <i>Translating or Oscillating Follower?</i> | 109 |
| | <i>Force or Form-Closed?</i> | 110 |
| | <i>Radial or Barrel Cam?</i> | 111 |
| | <i>Roller or Flat-Faced Follower?</i> | 111 |
| | <i>To Dwell or Not to Dwell?</i> | 113 |
| | <i>To Grind or Not to Grind?</i> | 113 |
| | <i>To Lubricate or Not to Lubricate?</i> | 114 |
| | <i>What Double-Dwell Cam Program to Use?</i> | 115 |
| | <i>What Cam Program to Use For Difficult or Complicated Motions?</i> | 115 |
| | <i>To Polydyne or Not to Polydyne?</i> | 115 |
| | <i>Camshaft Design</i> | 116 |
| | <i>Follower Train Design</i> | 116 |
| | <i>Follower Train Dynamics</i> | 117 |
| | <i>Natural Frequencies</i> | 117 |
| | <i>Backlash</i> | 117 |
| | <i>How Important is Theoretical Peak Acceleration?</i> | 118 |
| 8.2 | Twenty Rules of Thumb for Cam Design | 118 |
| 8.3 | References..... | 120 |
